

Self-Screening Prior to Coming in our Home

To keep our family member(s) and other team members safe, I am asking all Independent Contractors to do this Self-Screening prior to coming to our home

- Do you have any of the following symptoms: fever/feverish, new or existing cough, or difficulty breathing? (Note: not a chronic cough such as asthma, confirmed seasonal allergies, etc.)
- Have you traveled internationally within the last 14 days (outside of Canada)?
- Have you had close contact with a confirmed or probable COVID-19 case?
- Have you had close contact with a person with acute respiratory illness who has been outside Canada in the last 14 days?

If the independent contractor answers no to all the questions above, they have passed the screening and can provide support.

If the employee answers yes to any of the screening questions, they cannot provide support until further screening is completed.

If independent contractors are showing symptoms of illness that are not COVID-19 related, they should stay home until they are symptom free.

If independent contractors have travelled outside of Canada, they must self-isolate for 14 days.

Thank you.
